## // INTRODUCTION

Thanks for buying this file made exclusively for VideoHive.net.  
I believe this file should be very useful for those who need a fast solution and great design.  
Excellent opportunity to know how a professional After Effects composition works.  
All the work was done to be easily editable and understandable.  
Remember, with creativity you can customize the file to your needs.

## // DESCRIPTION

Metro Rush: a file that measures up to a dynamic world to showcase your most fast-paced ideas.

### Credits / Thanks

- The great music used in this project from SonicCube can be purchased separately here:  
<http://audiojungle.net/item/energetic-upbeat-intro-trailer/123878>
- The original photos used in the preview provided from Dreamstime, and they are not included. Can be easily replaced by yours.

Please rate if you enjoy!

## // GENERAL

All the precomps are inside the main composition “Metro\_Rush\_(main)”.

## // TIPS

- To verify the animated keyframes for each layer, select the layer you want and press “U”.
- To enter in any precomp double click in precomp layer.
- If you have any problems in your render, try the secret option in the preferences (hold shift when you click preferences). In secret tab, have a option “purge all after every XX frames”. Put number 30. It should work for most memory errors.

## // EDIT TEXTS

### MAIN TEXTS

To customize main texts use the precomps “text\_XX”..., inside of Precomps/texts\_and\_logo folder. Open these precomps, select text layer and edit with text tool. Stay tuned to the tips layer inside of these precomps about change texts.

### SLOGAN TEXT

To customize slogan texts use the precomps “layout\_08”..., inside of Precomps/layouts folder. Open these precomps, select text layer (layer 4 ) and edit with text tool. Stay tuned to the tips layer inside of these precomps about change texts.

## // REPLACE PHOTOS

In “Project window” under /Assets /photos folder select the file to be changed “photo\_01.jpg”, “photo\_02.jpg”, “photo\_03.jpg”, “photo\_04.jpg”, “photo\_05.jpg”, “photo\_06.jpg”.. Then right click and go to option Replace Footage/File ( Ctrl + H ) and choose the new file.

### PHOTOS AND VIDEO SIZE

\* The default photo size is 1280 x 720 px. Scale if necessary.

Other option is open the files “photo\_01.jpg”, “photo\_02.jpg”, “photo\_03.jpg”, “photo\_04.jpg”, “photo\_05.jpg”, “photo\_06.jpg”.. in the Adobe Photoshop and drag and drop your photo to a new layer. Just save file, and reload the file in the after effects.

## // CHANGE PHOTOS TO VIDEO

Just import your video to Project window ( ctrl+I ).

Inside Precomps / photos / select the desired “photo\_XX” precomps.

Drag and drop your new media from the “Project window” over select photo layer.

\* The default placeholder size is 1280 x 720 px. Scale if necessary. Select the media layer, and press “S” to verify scale parameter.

## // REPLACE FINAL LOGO

In “Project window” under /Assets /texts\_and\_logo folder select the file to be changed “your\_logo.psd”, then right click and go to option Replace Footage/File ( Ctrl + H ) and choose the new file.

### LOGO SIZE

\* The default logo size is 1280 x 720 px. Scale if necessary.

Other option is open the files “your\_logo.psd”, in the Adobe Photoshop and drag and drop your photo to a new layer. Just save file, and reload the file in the after effects.

## // ADD AUDIO

Use this link to purchase and download file.

<http://audiojungle.net/item/energetic-upbeat-intro-trailer/123878>

After download the audio file, in After Effects project window, just double click into file on:

Assets/audios/ audio\_metro\_rush,

so just relink your file.

## // RENDER

5 options for resolution are pre defined in Render Queue window.

01 / Metro\_Rush\_(main) - Full HD (1920x1080)

02 / Metro\_Rush\_(HDV) - HD (1280 x 720)

03 / Metro\_Rush\_(DV\_NTSC) - DV Widescreen (720 x 480)

04 / Metro\_Rush\_(DV\_PAL) - DV Widescreen (720 x 576)

05 / Metro\_Rush\_(half) - Half size (960 x 540)

Just mark the desired resolution in the window render queue and set the target folder.

The file is ready to generate a QuickTime Animation compressor, change according to your need.
