- Change the background color to fit your needs.
- Easy customization.
- 1920×1080 HD.
- 25 Frames Per Second.
- Adobe After Effects CS4 Project File.

Help Tutorial

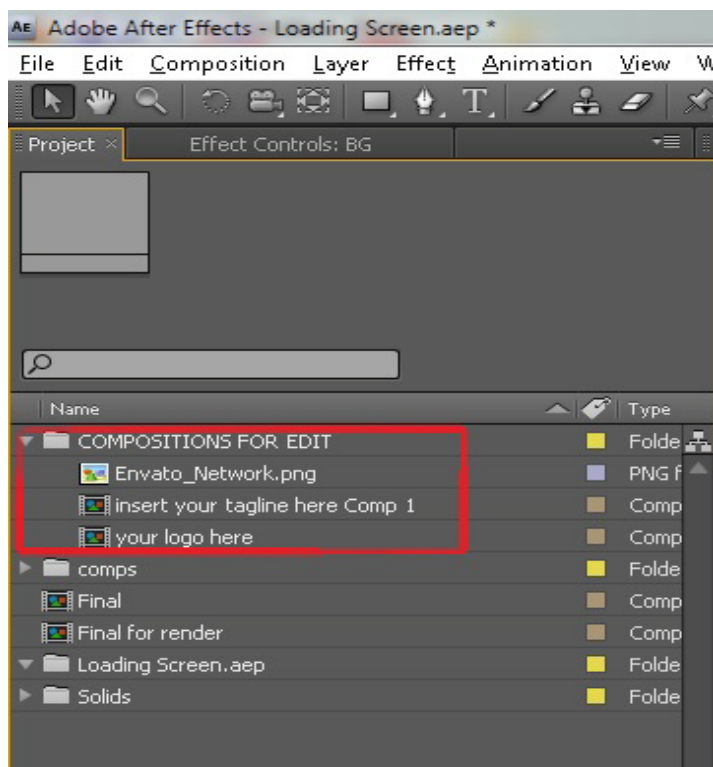

In composition named “Final” you can find comp named “BG”. Use “Color Balance” effect on that layer to change color (you will see that the color balance effects is multiplied by two one is red and second one is blue). When you turn off both of them you will have dark silver version.(example1 and example2)

Example1:

Example2

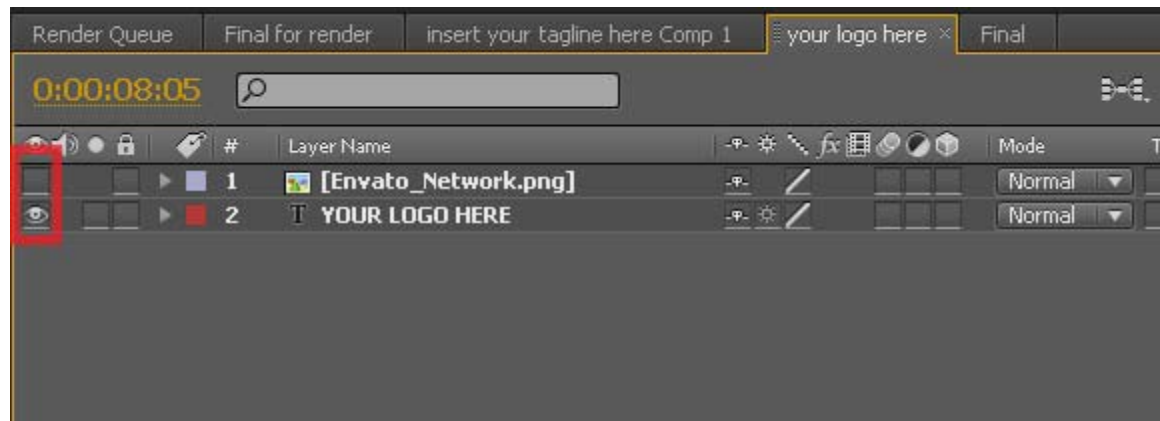

Example3

You can change your logo in compositions named “insert your tagline here comp1” and your logo here”.

If you your logo is jpeg or any other picture file only thing you have to do is to click right mouse button on “Envato_network.png” go to Replace footage/File...and then choose your Logo (example3).

If you have your logo as a text just enter “your logo here” comp, delete or turn off eyeball for “envato_network.png” and turn eyeball for “your logo here text” (example4). To edit text

“your logo here text” watch example5.
